PRODUCT	INSTRUMENTS PROCLINIC	
REFERENCE	See attached annex	
COMPANY	PROCLINIC S.A. Plataforma Logística Plaza C/ Palermo, 9 50197 Zaragoza (Spain)	
CLASSIFICATION	Medical Device, Class I, Directive 93/42/EEC	
PRODUCT DESCRIPTION	Instruments for dental practice.	
SPECIFICATIONS	Description of the material: Stainless Steel Grade: AISI 410 Hardness: 42 HRC (Rockwell) 177Brinal Max	
PACKAGING	Each instrument is packed in high-density polyethylene bag, sealed both ends.	
SHELF LIFE	N.A. The properties, function or use are not affected automatically, if properly stored.	
INTENDED USE	Intended to be used in the support function during the operations in the dental clinics by qualified personnel.	
SAFETY INFORMATION	The devices used in the analysis are re-useable, however cleaning and sterilizing is necessary before each use. If there is any indication of rust the instrument should not be used.	
TRANSPORT AND STORAGE CONDITIONS	Cleaning instructions are provided along with the instruments.	
MSDS	N.A.	
INSTRUCTIONS FOR USE	- Sterilize before use. - Before sterilization remove existing packing, clean the instruments and pack in sterilize-able pouch/sheet. - Wear Gloves while using the instruments. - Be careful of the sharp point of the instruments, if any. - Be careful of the moving parts of the instruments. - The instruments must be stored in dry place and must be handled with care to prevent damage. - Only qualified person should use the healthcare devices. Use only for its intended purpose to ensure maximum effectiveness. - After use the instruments should be disposed off according to local laws.

CLEANING INSTRUCTIONS	<i>Inner portions of joints of the devices need particular attention during cleaning.</i> 1) <u>MANUAL CLEANING:</u> Equipment: Latex Gloves, Chloroxylonol Detergent, non-metallic brush and running water. Method: 1. Wear Latex Gloves. 2. Rinse instruments in water having temperature 30 to 40°C. 3. Using brush apply detergent solution to all surfaces ensuring that joints of the instruments are cleaned both in open and closed positions. 4. Rinse under clean running water for 3 to 4 minutes with temperature 30 to 40°C. Ensure that running water passes through cannulations and that blind wholes are repeatedly filled and emptied. 2) <u>AUTOMATIC CLEANING:</u> Equipment: Latex Gloves, liquid detergent having pH 7.0 to 8.3 and Washer / disinfectant unit preferably ultrasonic cleaning unit fitted with heater. Method: - Wear Latex Gloves. - Load instruments in a way that hinges / joints are open and cannulations holes can drain in the basket / hanger of the washer/disinfectant unit. - Rinse instruments under running water having temperature 30-40°C. - Place basket / hanger containing instruments into unit. - Run standard washing cycle for 5 to 6 minutes at 70-75°C. - Rinse under hot water for 3 to 4 minutes. - When unloading check cannulations, holes etc. for complete removal of visible soil etc. If necessary repeat cycle or use manual cleaning. - Dry the instruments using lint free cloth or dry air chamber. Disinfection: Disinfectant solution like Chloroxylonol may be used in accordance with label instructions. Sterilization: Gas Sterilization The instruments may be gas sterilized using Ethylene Oxide mixture. Follow sterilizer manufacturer's recommendations. In other respects all instruments are suitable for ETO gas sterilization. The usually ethylene oxide mixture is 12%EO-88% FREON at 52°C 105 minutes but the sterilizer manufacturer's recommendation must be followed. Or Steam Sterilization: Instruments may be steam autoclaved at 121°C for 15 minutes or 134°C for 3.5 minutes.
